

Experience Day 9: Sunclass Airlines

Sunclass Airlines is Scandinavia’s biggest leisure airline, servicing Nordic Leisure Travel Group customers from more than 35 airports in Scandinavia. Sunclass Airlines operates a modern fleet of Airbus 321 and Airbus 330 on medium and long haul.

Sunclass Airlines was the first airline in Europe to be approved for evidence based training, a paradigm shift in the airline training industry. The training is competency based on a comprehensive study of more than 3000 accidents and incidents, 30.000 line orientated safety audits and flight data monitoring have provided a new data set for needed training. It is recognised that we are unable to predict all possible outcomes, but the training delivered in the Evidence Based Training context is designed to increase the resilient capacity of the crew, and tailored to the individuals needs.

On the experience day to Sunclass Airlines you will be visiting 4 different stations:

- A briefing on the Evidence Based Training concept and how it is being used in the recurrent simulator training for pilots.
- A briefing on the analysis made by the safety department, training department and flight ops department in Sunclass Airlines and how these are used for policy making and training topics.
- A visit to the cabin crew simulator where you will participate in a simulated evacuation of an aircraft, instructed by cabin crew instructors.
- A visit in the flight crew simulator. You will experience the daily work of a pilot in a highly realistic full motion aircraft simulator.

We look forward to welcoming you aboard the Sunclass Airlines training department.

Programme for the visit

Time	Activity
8.15 - 8.45	Transport from Bella Center to Sunclass
8.45 - 9.00	Registration and coffee/tea
