Key Messages

People experiencing homelessness (PEH) and their experiences of healthcare matter

Involving people with lived experience of homelessness in research helps shape and inform meaningful outcomes

Asking the right questions and enabling feedback through a variety of methods will assist in targeting areas for improvement that are going to have a bigger impact on PEH and the wider community across healthcare services

Overview

Who we are

Problem identification

Designing the scoping review

Methods

Through a lived experience lens

- An illustrative example of pivotal moments uncaptured in patient experience data

Results

Conclusion

Who are we?

Claire Doherty

Senior Research and Evaluation
Officer

Healthcare for the Homeless
Department

- How the HftH Department
was established

Matthew Scott

Lived Experience Support
Worker

Healthcare for the Homeless
Department

- What is ALERT?
- What is the Cottage?

James Morrow

Consumer with a lived
experience of homelessness

Healthcare for the Homeless
Department

Problem identification

Patient Experience Surveys

State-wide and locally, identifying PEH in patient experience surveys is challenging

How is data collected?

SMS, Email
Moved to electronic format
Post-discharge

We can't improve on things we don't understand

Barriers that may exist

Access to technology
Competing priorities
Where does the information go?

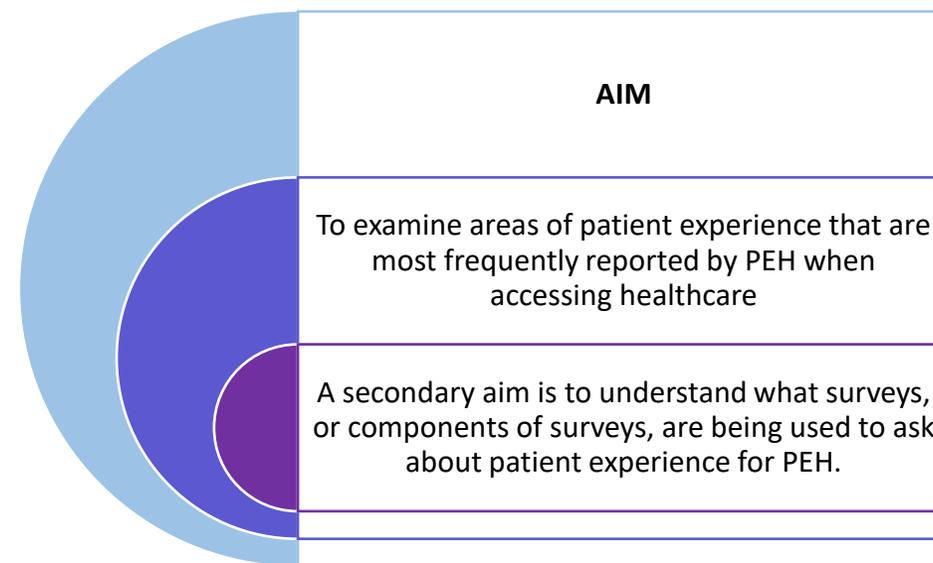

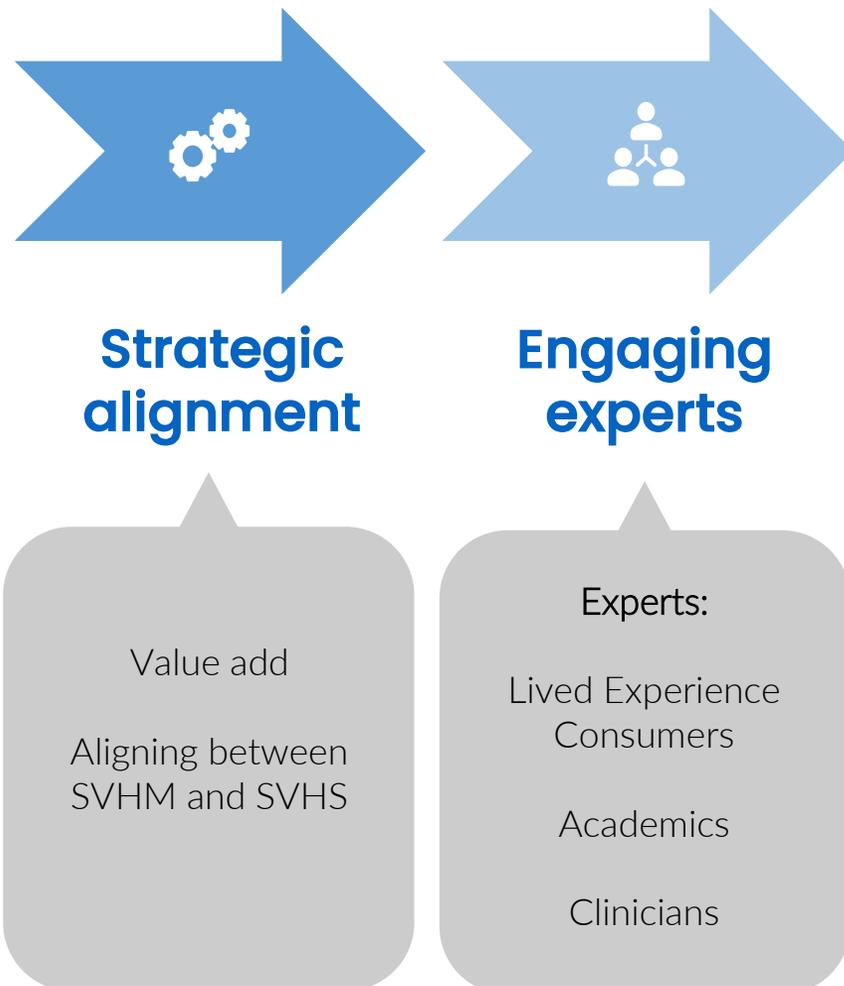

Consumer Voice

How well is the voice of PEH represented in the data SVHA collect?

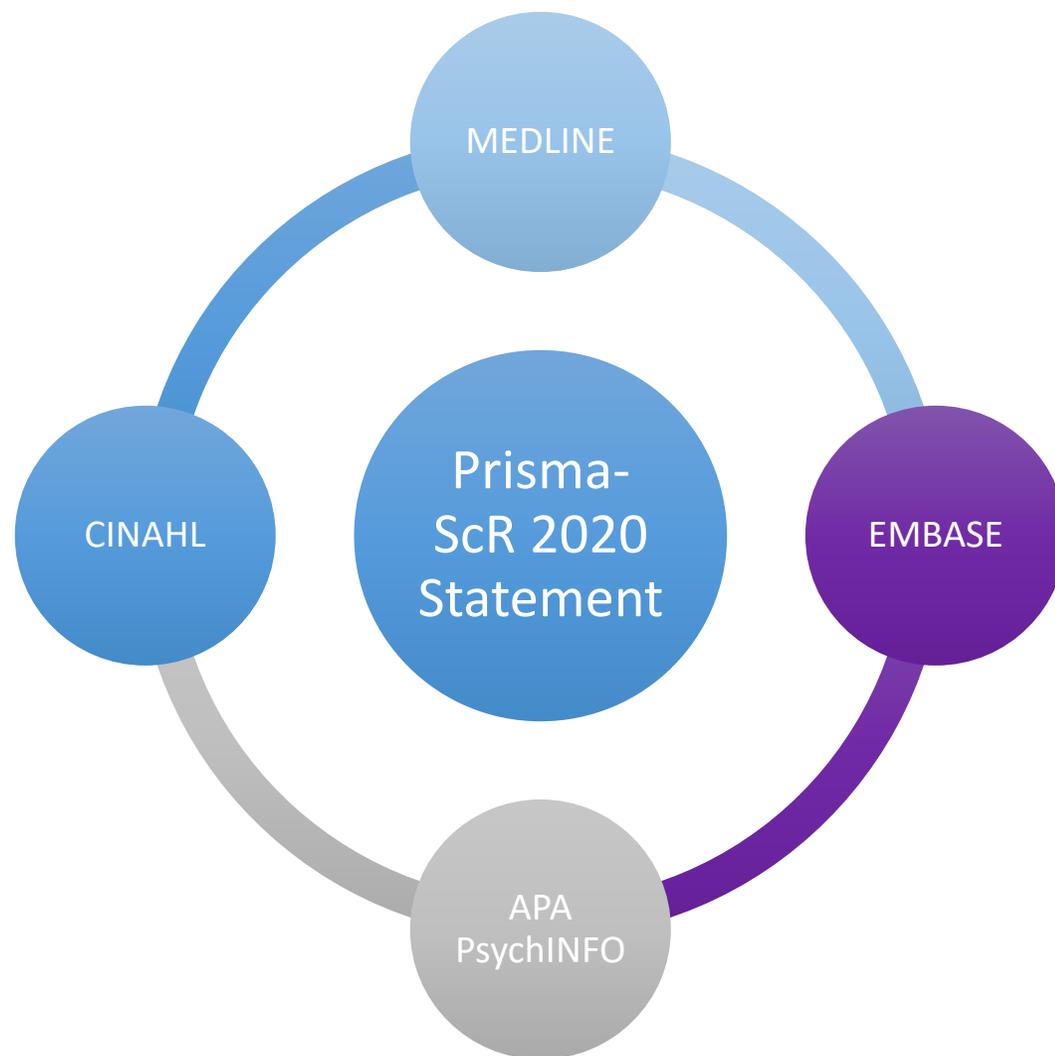

What does the literature say?

What does matter?

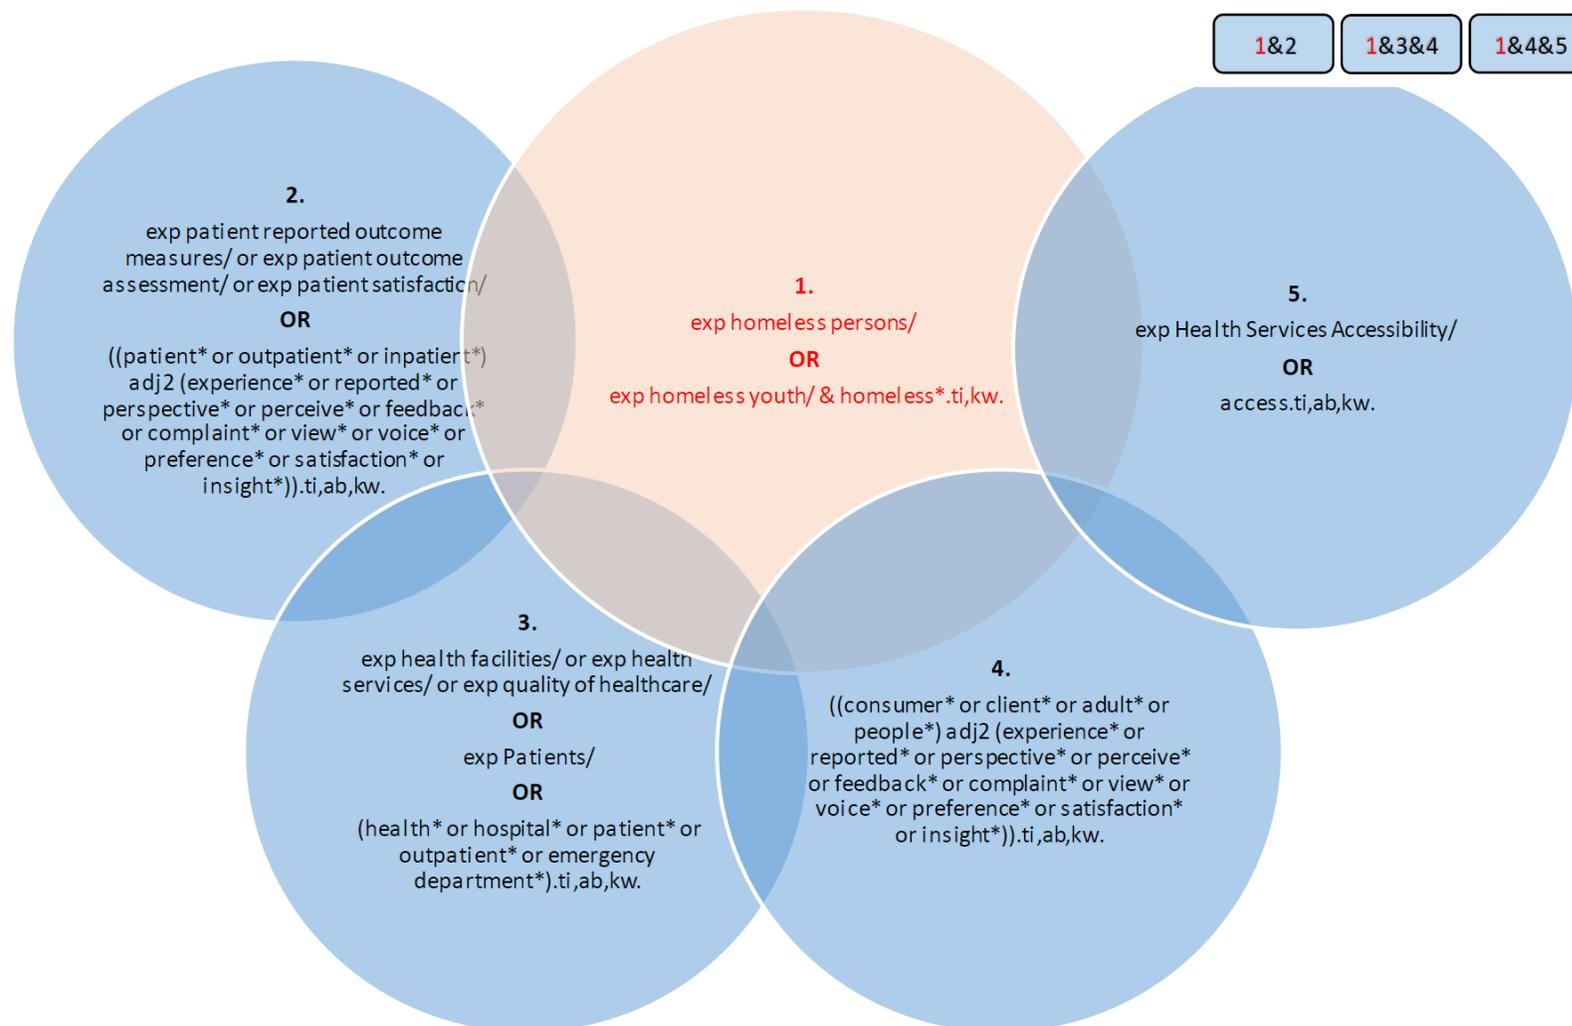

Designing the scoping review
